

Rochester Math and Science Academy (RMSA)

Mission:	Maximize opportunities for children through educational innovation that will ensure their full development as healthy and positive contributors to the greater community.
Vision	The vision is to meet the distinct needs of Rochester's diverse student population. We will use projects and mentorships to integrate learning, encourage daily reading and writing, and motivate academic achievement. Rochester Math and Science Academy will place the student at the center of a diverse and mutually respectful educational community of teachers, parents, inter-generational community volunteers, and experienced teachers who will all act as guidance counselors and student advocates. We will encourage and assist parents and other adults to reinforce student academic performance through extensive student writing and reading. We will work to foster character, initiative, leadership, problem solving, critical thinking, teamwork, and communication as well as academic skills in math/science/technology, the humanities, and communication.
Program focus:	Child-centered, serving the immigrant population, multi-cultural environment, emphasis on reading, writing and math, innovative education, intergenerational and parent community involvement, high academic standards.
