Subject: Complaint Closure – Rochester Math & Science Academy

Dear Board Chair Abdalla and School Leader Shekh:

Thank you for RMSA's cooperation and responsiveness throughout PUC-OPCS's review of the stakeholder complaint received by our office. We appreciate the time and effort your team devoted to responding to our requests, reconciling staffing information, and providing additional documentation and clarification.

PUC-OPCS conducted a reasonable inquiry into the allegations, including reviewing the school's responses and supporting documentation, staffing and licensure information, instructional assignments, and information regarding the school's MDE special education corrective action status.

Based on the information provided and reviewed, **PUC-OPCS has not identified sufficient evidence of a violation requiring further authorizer action. Accordingly, PUC-OPCS is closing its review of this complaint.**

The information provided by RMSA substantially resolved the questions identified during the review, including clarification of staff roles, employment status, instructional assignments, and licensure information. PUC-OPCS also received documentation from MDE confirming that RMSA met its obligations under the special education corrective action process and was released from further corrective action.

During the review, PUC-OPCS identified **opportunities for RMSA to strengthen its internal processes for reconciling staffing, assignment, and licensure information and for maintaining consistent public-facing information.** While these matters do not provide a basis for further authorizer action under the complaint process, we encourage RMSA to continue strengthening these systems as part of its ongoing operations.

We appreciate RMSA's partnership and constructive engagement throughout this process. We recognize the work the school has undertaken to respond to the concerns raised and to clarify its records. PUC-OPCS looks forward to continuing to support RMSA through our regular authorizing relationship.

Thank you again for your cooperation.

Sincerely,
